National averages data is based on patient-reported outcome surveys and Stryker national database of hospital-reported outcomes data. The national average statistics cited in this document were obtained by Alomere Health through its subscription to Stryker Performance Solutions, an additional service available to Mako customers with the purchase of a Mako System. Stryker Performance Solutions provides Mako customers with access to patient- and hospital-reported outcomes data which enables the Mako customer to benchmark their performance in specific metrics against state and national averages. The statistics contained in this document may not be solely attributable to the installation and use of the Mako System and may be influenced by other factors, including, but not limited to, individual surgeon practices, hospital policies or programs and/or patient population demographics. All surgery carries risk. See your orthopaedic surgeon to discuss your potential benefits and risks. Not all patients will have the same post-operative recovery and activity level. Individual results vary. Stryker Corporation or its other divisions or other corporate affiliated entities own, use or have applied for the following trademarks or service marks: Mako, SmartRobotics, Stryker. All other trademarks are trademarks of their respective owners or holders. MKOSYM-PM-27_29066 © 2021 Stryker Insightful Data Analytics, LLC.
